

SPRING 2020

CANADA

A decorative border of cannabis seeds runs along the left and bottom edges of the page. The seeds are light brown and oval-shaped, with some showing darker spots or patterns.

OUR STORY

After investing years of building relationships with some very talented breeders and growers, we have obtained some of the best genetics in existence.

Our decision at Elev8 Seeds to carry a strain depends on whether we believe that strain to be a definite “keeper”. By working with large medical marijuana growers, we at Elev8 Seeds have had the opportunity to compare countless strains side by side in the same environment to find that top 1% that people search so hard for.

OUR MISSION

Elev8 Seeds’ mission is simple: to provide the best genetics in seed form to those that know the value of world-class genetics.

THE ELEVATION OF GENETICS

“Some people breed strictly for yield. Others cross strains just because. We research the flavor and the high, we read forums and grow reports. When I have the idea that two strains will complement one another well, I try to locate the strains; I want to breed something I’m excited about and I’ll enjoy smoking.”

— **Matt**

*The mad scientist
responsible for our genetics*

HYBRIDS

Optimized Benefits

Hybrids are the perfect combination of performance and relaxation. Indica dominant for pain relief, Sativa dominant for boosting focus. Together these bring optimal effects to both mind and body.

GORILLA COOKIES

Thin Mint Girl Scout Cookies x Gorilla Glue #4

- Type:** Hybrid, Sativa Dominant
- Flowering Time:** 8-9 weeks
- Yield:** Excellent
- Potency:** High
- Seed Type:** Feminized, Regular

The taste and smell of Gorilla Cookies is very strong and unique. Most noteworthy, it has the pungent funk from the Gorilla Glue combined perfectly with the exotic notes of the Thin Mint. The highly unique and delicious taste will coat the inside of your mouth. This strain is LOUD! Likes to stretch in flower so plan/train accordingly.

BLACKBERRY DREAM

Kimbo Kush x Super Silver Haze

- Type:** Hybrid
- Flowering Time:** 9-10 weeks
- Yield:** Very Good
- Potency:** High
- Seed Type:** Regular

Extremely euphoric, almost opiate. Mind is creative and contemplative while body warm and relaxed. Great after-dinner smoke.

SHERBET

Pink Panties x Girl Scout Cookies

- Type:** Hybrid, Indica Dominant
- Flowering Time:** 8-9 weeks
- Yield:** Good
- Potency:** High
- Seed Type:** Feminized

Stress, tension, and sour moods melt away with the carefree mindset and physical relaxation that comes with this rich hybrid.

THIN MINT GIRL SCOUT COOKIES

Durban Poison x OG Kush

Type: Hybrid, Indica Dominant
Flowering Time: 9 Weeks
Yield: Medium
Potency: Very Potent
Seed Type: Feminized

Most popular cut of Girl Scout Cookies. Tons of frost with a mild taste of cookie dough, and a hint of mint.

SOUR PATCH KISS

Kimbo Kush x Sour Kush

Type: Hyrbid, Sativa Dominant
Flowering Time: 8-9 Weeks
Yield: Heavy
Potency: Extremely Potent
Seed Type: Feminized, Regular

This strain has it all – good yield, insane amounts of gooey stickiness and a delicious, loud smell of sour candy.

XTC OG

Thin Mint Girl Scout Cookies x Tahquitz OG

Type: Hybrid, Indica Dominant
Flowering Time: 9-10 weeks
Yield: Good
Potency: High
Seed Type: Feminized

XTC OG has chunky solid buds and is glazed in trichomes at maturity. Vigorous and bushy, she is a very good yielding plant with a potent, motivating high.

AUTOFLOWERS
Saves Time and Resources

Autoflowering seeds produce resilient plants that can grow to maturity in challenging environments. Desirable to indoor growers with limited room or resources, they flower on their own schedule regardless of the light cycle and can go from germination to harvest between seven and ten weeks.

ALIEN OTTO

Elev8 Breeding Auto x Toofless Alien

Type: Autoflower
Flowering Time: 70 days from seed
Yield: Good
Potency: High
Seed Type: Feminized

Alien Otto is a high quality autoflower that primarily likes to stay short with big chunky frosty buds. Our Elev8 breeding male is a large yielding OG dominate auto strain. Crossing our male with Toofless Alien has produced a cross with terpenes that are a delicious mixture of OG dankness with a touch of sweetness.

SHADOW OG

Elev8 Breeding Auto x Supernatural OG

Type: Autoflower
Flowering Time: 70 days from seed
Yield: Very Good
Potency: High
Seed Type: Feminized

Shadow OG is a cross between our autoflower breeding male and Supernatural OG Autoflower. Our large OG dominate male crossed with Supernatural OG produces a large yielding cross with plenty of frost with a dank OG Kush terpene profile. Shadow OG likes growing large, fat colas.

SATIVA

Dense and Uplifting

Uplifting and euphoric, sativas are known to be a stimulus for creativity. It helps to improve concentration and overall energy in the body

TANGERINE COOKIES

Tangie x Thin Mint Girl Scout Cookies

Type: Sativa
Flowering Time: 8-9 Weeks
Yield: Heavy
Potency: Very High
Seed Type: Regular

The cross between the two reintroduced hybrid vigor to bring a surprisingly high yield from a cross of two mediocre yielders. Every bud from the top cola to the bottom buds were rock hard and dripped with resin. To say the buds were stunning is an understatement.

SHERBET COOKIES

Sunset Sherbet x Girl Scout Cookies

Type: Sativa
Flowering Time: 9 Weeks
Yield: Very Heavy
Potency: High
Seed Type: Feminized

The Thin Mint Girl Scout Cookies is a connoisseur strain renowned for its potency. Sunset Sherbet is a favorite with many strain snobs and known for its amazing smell/taste like no other strain.

STRAWBERRY SNOW CONE

Strawberry Cough x Sour Diesel

Type: Sativa
Flowering Time: 8-9 Weeks
Yield: Heavy
Potency: Extremely Potent
Seed Type: Regular

Strawberry Snow Cone is a heavy yielding sativa that will make a room smell like sour strawberries. The smell is loud and the flavor is unbelievably delicious and unlike anything we've ever encountered in another plant.

M2

Sri Lankan x Original Thai (extinct) x Acapulco Gold x (South African x Original Haze)

Type: Sativa
Flowering Time: 14 Weeks
Yield: Massive
Potency: High
Seed Type: Regular

M2 is a cross of several landrace sativas bred specifically for the quality of the high. It makes up for its longer flower time with its shorter veg time and massive yield. Buds can be somewhat airy but it has the best high of any strain (we have ever smoked).

GORILLA GLUE
Sour Dubb x Chem Sis x
Chocolate Diesel

Type: Hybrid
Flowering Time: 8-9 weeks
Yield: Heavy
Potency: Extremely Potent
Seed Type: Feminized, Regular

Gorilla Glue is thought by many to be one of the most potent strains in existence. This rockstar strain won the 2014 Cannabis Cup as best hybrid. Extremely potent and has a soaring high.

SHERBET PUNCH
2 Scoops (Grape Sherbet x Orange
Sherbet) x Purple Punch

Type: Hybrid, Indica Dominant
Flowering Time: 9 Weeks
Yield: Good
Potency: High
Seed Type: Feminized

Sherbet Punch is a perfect combo of it's parents. 2Scoops which is loud and frosty with a hint of that old school push pop, and Purple Punch with even more frost and delicious grape terpene profile.

CBD

Phytocannabinoids:Therapeutic Attributes

CBD has proven to be an effective treatment for PTSD, chronic pain, arthritis, multiple sclerosis, sleep disorders, fibromyalgia, anxiety, etc. CBD counteracts THC’s paranoia while amplifying its painkilling properties.

HARLEQUIN — CBD

Cross From Multiple Indica and Sativa Landraces

Type: CBD
Flowering Time: 8-9 weeks
Yield: Good
Potency: 3:2 CBD to THC
Seed Type: Feminized

These feminized seeds are made from two Harlequin females. The benefit of feminized seeds in CBD strains is that phenotype expression can sometimes be more predicable in the offspring, producing a more consistent CBD to THC ratio. Flavors range from earthy musk to sweet mango but what makes Harlequin so popular is its ability to relax without sedation and to relieve without intoxication.

QUEEN HARLEY — CBD

Harlequin CBD x Remedy CBD

Type: CBD
Flowering Time: 8-9 weeks
Yield: Good
Potency: 28:1 CBD to THC (14% CBD and .5% THC)
Seed Type: Feminized

By combining Remedy with our Harlequin, the result is that most phenotypes will tend to produce more CBD and less THC than Harlequin. For people that want pain and/or anxiety relief with virtually no psychoactive effect, this would be a great cross for them.

INDICA

Deep and Relaxing

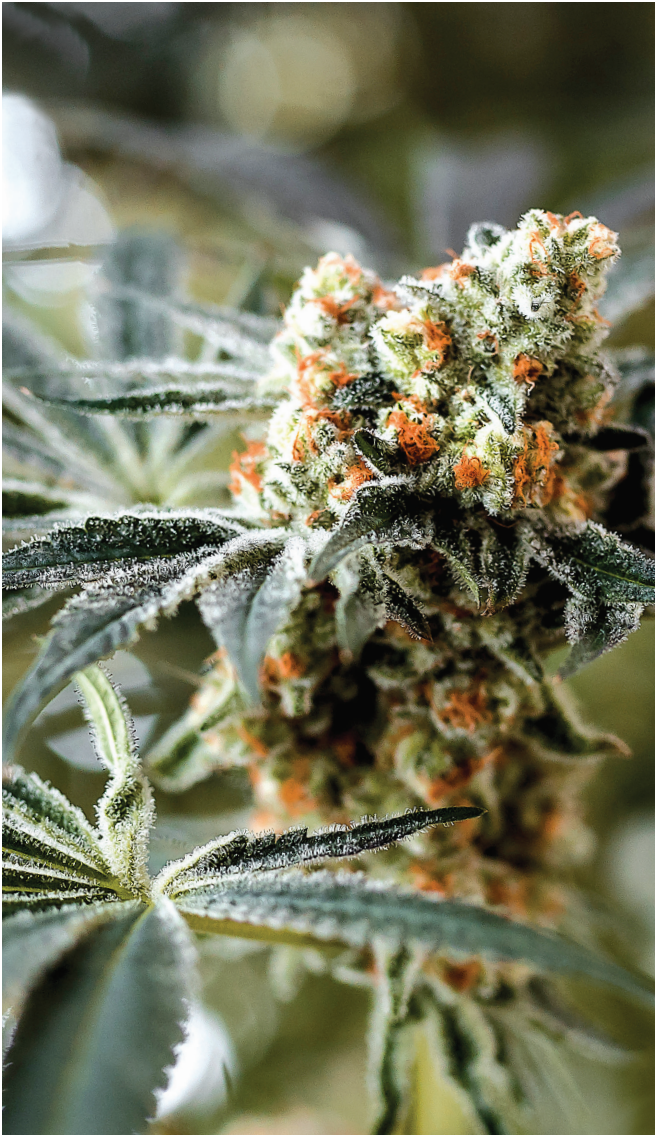

Most indica plants are native to the chilly mountains of India, Afghanistan, and Pakistan. The buds are dense and the leaves short and stocky. It gives a deep body high, enhancing the quality of sleep and relaxing the mind, which is why it is used to treat anxiety, insomnia, and chronic pain.

GELATO PUNCH

Purple Punch x Gelato #33

- Type: Indica
- Flowering Time: 8-9 Weeks
- Yield: Very Good
- Potency: High
- Seed Type: Feminized

Gelato Punch is a mouth-watering cross that combines the exotic sweetness of Gelato #33 with the grape sweetness of Purple Punch. The buds are dense, super frosty with a smell/taste that will make your mouth water.

SUNDAE PUNCH

Purple Punch x Sundae Driver

- Type: Indica
- Flowering Time: 8 Weeks
- Yield: Good
- Potency: High
- Seed Type: Feminized

Sundae Punch is a vigorous, large-yielding cross between the infamous Sundae Driver and Purple Punch. The cross of these legendary genetics are sure not to disappoint.

GELATO #33

Thin Mint Girl Scout Cookies x Sunset Sherbet

- Type: Indica
- Flowering Time: 8-9 Weeks
- Yield: Good
- Potency: High
- Seed Type: Feminized

This tasty strain is famous for its delicious flavor and euphoric high. This strain has a flavor that's said to be much like a sweet sherbet, with fruity blueberry and orange flavors.

PUNCH CAKE

Gelato #33 x Wedding Cake

Type: Indica
Flowering Time: 8-9 weeks
Yield: Excellent
Potency: High
Seed Type: Feminized

An enticing combination of grape candy from Purple Punch, and cookie gas from Wedding Cake. The frost and dense buds from both parents carries through for insanely beautiful bag appeal.

FRUITY PUNCH

Purple Punch x Fruity Pebbles OG

Type: Indica
Flowering Time: 8-9 weeks
Yield: Good
Potency: High
Seed Type: Feminized

Fruity Punch combines the large yielding fruitiness of Fruity Pebbles with the grape sweetness and frost of Purple Punch.

NEW!
GELATO STRAINS!

GELATO KISS

Gelato #33 x Sour Patch Kiss

Type: Indica
Flowering Time: 8-9 weeks
Yield: Excellent
Potency: High
Seed Type: Feminized

LEMON GELATO

Gelato #33 x Lemon Tree

Type: Indica
Flowering Time: 8-9 Weeks
Yield: Very Good
Potency: High
Seed Type: Feminized

TRIPLE SCOOPS

Gelato #33 x 2Scoops

Type: Indica
Flowering Time: 8-9 Weeks
Yield: Good
Potency: High
Seed Type: Feminized

GELATO SUNDAE

Gelato #33 x Sundae Driver

Type: Indica
Flowering Time: 8-9 Weeks
Yield: Very Good
Potency: High
Seed Type: Feminized

STRAWBERRY GELATO

Gelato #33 x Strawberry Snow Cone

Type: Indica
Flowering Time: 8-9 Weeks
Yield: Good
Potency: High
Seed Type: Feminized

RUNTZ

Gelato #33 x ZSkittles

Type: Indica
Flowering Time: 8-9 Weeks
Yield: Good
Potency: High
Seed Type: Feminized
